

Natural Weed Control Blanket

Terrafibre™ Natural Weed Control is a blanket made from the fibrous component of the industrial hemp plant. The blanket is fully biodegradable and is used for suppressing unwanted weeds in various landscape situations. The thick, 1000 grams per square metre blanket allows zero light penetration which effectively suppresses weeds, prevents soil erosion, and preserves soil moisture. The insulation properties of hemp ensure protection from temperature extremes ensuring an ideal growing environment for trees, flowers, and shrubs it surrounds.

Test Description	Test Method	Test Results
Water Absorption	ASTM D 1117/ECTC	1032.4%
MD- Tensile Properties	ASTM D 6818	31.0lb/in
TD- Tensile Properties	ASTM D 6818	24.0 lb/in
MD- Elongation	ASTM D 6818	95.2%
TD- Elongation	ASTM D 6818	74.6%
Thickness	ASTM D 6535	0.50 inches
Light Penetration	ASTM D 6567	0%
Mass/Unit Area	ASTM D 6475	1000/sq meter
Shear Stress	ASTM D 7207	6 lbs/sq.ft.

Standard Roll Size	
Width	8.0 ft (2.4 m)
Length	50 ft (15.25 m)
Weight	82.5 lbs (37.4 kg)
Area	800 sq ft (74.32 sq m)
Material	
Fiber	100% Hemp Fiber
Scrim Backing	Rayon String Recycled Pulp Tissue

Key Benefits:

- Sustainable: Hemp is a natural, renewable and fully biodegradable resource that will break down in 3-4 years providing nutrients back into the soil.
- Canadian Made: All of the hemp used in our products are grown, processed and manufactured in Canada.
- Applications: As an alternative to landscape fabric and/or mulch.

Installation:

1. Simply roll out Terrafibre™
2. Secure firmly with 6 inch staples to ensure the blanket cannot be blown away by wind.
3. Overlap all edges by 4 inches.
4. Make an "X" incision with a utility knife for planting.
